Dear Sirs,

Doris Seau came to our organization for two years giving excellent massage to our students. Promised Land is a special education organization with students with varying disabilities. We have students with autism, down syndrome, cerebral palsy, brain damage and other developmental disabilities. Doris' expertise in the field of massage for special needs children was obvious immediately. First, she made the children comfortable with her and the massage room, all new to our students, but soon our students looked forward to Wednesday Massages.

Doris' technique helped our students relax and stimulated their muscles, so students improved in both their gross and fine motor skills. We consider massage for special needs children an important part of our overall curriculum. Our students enjoyed the massage therapy and benefited from it as well.

Doris' massage therapy for special needs children would be a wonderful asset to all school environments where there may be children with developmental issues.

I highly recommend Doris Seau and her massage program. If you have any questions feel free to contact me at the above number.

Corrinne Reynolds

Chairman, Promised Land
